ABOUT SCIOMETRIC

Sciometric has worked with manufacturers for over 40 years to solve their biggest productivity and quality issues and optimize their production lines quickly. Sciometric's people are specialists in modern manufacturing and industrial processes, with technology, products, and experience that span the assembly line and beyond. To harness the full potential of the Industrial Internet of Things (IIoT) and Industry 4.0, it's not enough to just collect data from processes—you need to collect the right data and be able to access insights to help you improve your line.

Sciometric's process monitoring, data collection, and data analytics capabilities help customers achieve actionable insight in real-time. This empowers individuals to become effective agents of change in their organizations and drives continuous improvement in quality, profitability, and efficiency. The breadth and depth of Sciometric's expertise comes of walking thousands of manufacturing lines, creating hundreds of applications, and installing thousands of systems worldwide
